## **FBI'S CYBER DIVISION RANSOMWARE SLICKSHEET**

*April 21, 2016*

The FBI's Cyber Division has issued a Ransomware Slicksheet ([click here](#)) document this week. This document is geared towards private sector and law enforcement. It has been disseminated via FBI portals (e.g. Infragard, FBI.gov, IC3.gov, etc.) and to law enforcement association partners.

Although you may have already seen this via the above outlets, I am sending you this email to make sure you have this information. Do NOT send via public websites and please keep out of media outlets. It is a helpful easy to read document.

Background:

The FBI has undertaken an initiative to inform private sector, law enforcement, and the public about the threats surrounding ransomware. Part of this initiative involves providing strategic messaging for dissemination to entities which have been/may be targeted by ransomware.

The FFIEC issued an Extortion statement last November – it can be viewed <http://www.ffiec.gov/press/pr110315.htm>

Please contact me if you have any questions or feedback about the information contained in this email.

Caroline C. Jones  
Commissioner
